ATV TRAILER

CBP's All Terrain Vehicle (ATV) Deployment Trailer is designed for convenience and functionality. The greatest design feature is its ability to be easily packed on top or even inside current mobility containers used by the Armed Forces. If you currently struggle with a metal trailer that is heavy, bulky, and odd-shaped Creative Building Products has a great alternative product that's lightweight, compact, rustproof and easy to store. Manufactured of poly plastic the trailer is not only lightweight, but also easy to maintain and deploy. This product will eliminate deployment personnel from using plywood to separate the metal/aluminum ATV trailers from the metal containers.

No longer will you waste time loading and unloading an unattended trailer. The CBP ATV Trailer arrives complete with a solid plastic lid capable of being padlocked thus keeping stored items safe, dry and secure. With the cover in place it's ideal for transporting war meds, and other material that can be ruined when exposed to the elements.

The ATV Trailer bed size measures 72" long x 36" wide x 18" deep. Itself weighing 250 lbs. the trailer will hold approximately 1500 lbs. of cargo and, as an added benefit, it will float with approximately 300 lbs. of cargo, if necessary. Two (2) men can easily assemble the ATV Trailer in approximately 5 minutes with no tools or loose hardware. It has a removable 54" long tongue and utilizes 24" tires with Honda rims, thus the same spare tire that is used on the ATV will fit the Trailer. This is not only a convenience but also a considerable savings. The fenders stay with the wheel/tire assembly making it compact and easy to store inside the trailer compartment. Olive Drab and Desert Tan are the most common colors however any color is available upon request of which all include a UV inhibitor.

The capability of removable axle hub/tire rim assemblies that can be stored inside the trailer compartment makes this ATV Deployable Trailer a unique and compact product that easily breaks down into one complete cube for ease of deployment in a matter of minutes. Optional equipment for the ATV Trailer includes snow skis for the wheels and an equipment box for your ATV.

The Trailer is a quick and effective tool for transporting cargo from place to place and for all other tasks. The ease of deployment and the compact frame make this ideal for S4, Medics and SF. It can be utilized by all branches of the Military, Guard Units, Border Patrols, Embassies, Airports and in civilian applications, both in the U.S. and overseas.

SPECIFICATIONS:

- 36" wide x 18" deep x 72" long
- 1500lb capacity
- 250lb approximate weight
- High Quality Construction
- Removable 54" long Tongue

Optional Equipment Box that fits on ATV.

The Trailer is a quick and effective tool for transporting cargo from place to place and for other tasks. Optional equipment includes a pair of snow skis for the wheels.

The CBP ATV Trailer is designed for convenience and functionality. Two men can easily assemble the ATV Trailer in approximately 5 minutes with no tools or loose hardware required. The 54" long tongue and 24" tires with Honda rims are removable and can be stored inside the Trailer itself, effectively breaking down into a compact cube for deployment.

Notice that the ATV Trailer arrives complete with a solid plastic lid that is capable of being padlocked in order to keep stored items safe, dry, and secure. In addition, the lid can also be used by itself as a towing sled.

By itself, this product only weighs 250lbs but can hold approximately 1500 lbs of cargo. As an added benefit, it will float, if necessary, carrying approximately 300 lbs of cargo.
