D. Sand Weight is 12,500 lbs

E. Superior strength supports

F. Designed to stand side-by-side

G. Can be moved with a forklift

H. Dumps for ballast removal

Please note that this brochure is still in development.

The 967 Ultra High Threat Barricade is 8 feet tall by 7 feet long. The gray and tan granite colors make a great blend with other structures while still providing the maximum blast protection using sand for mitigation. Desert Tan and Olive Drab are also available if desired.

No heavy equipment is necessary to install the barricade and it can be repositioned when threat changes occur. This product is ideal for Airports, Federal Applications and any place where there are blast mitigation concerns. This barricade, as well as all the other high density polyethylene products from CBP, is known for catching shrapnel and eliminating rebound and ricochet.

A. Sand Dump screws off

B. Fast Removal of Ballast

F. Corner for 90 degree angles

F. Corner for 90 degree angles
