***It is important to never use just one bollard. Two are required for minimum proper protection.**

Creative Building Products would like to call special attention to the Decorative Concrete Bollard Cover. Since September 11th, crash barriers have become more and more prevalent in both civilian and military applications; however, simply using a steel crash barrier isn't always the best or the most attractive solution. With that in mind, CBP has designed a pleasing alternative that will not only give the highest level of security demanded by our customers but also offer an architectural ornament that will complement any landscape.

Public safety and the security of government buildings have taken on a new sense of urgency. The Decorative Concrete Bollard Cover can provide a simple, secure and cost effective method of protecting the public from accidents and acts of terrorism by providing strong, cost-effective safeguards. When strategically located, the Bollard will give 24-hour protection and there's no need to worry about appearance. With its stone washed look it will make an aesthetically pleasing addition to your security.

Capable of being customized for any situation the CBP Bollard Cover is manufactured with the following sizes: cover diameters: 18", 20", 24", and 28"; corresponding cover heights: 42", 48", 54" and 60". These precision controlled sizes ensure that the Cover will fit over any steel bollards that are between from 3' to 5' in height. The Bollards Covers can also be customized to fit any size, shape or situation by simply measuring your existing steel bollard and calling us with your specific needs.

If requested, CBP will also manufacture the steel bollard to fit inside the Bollard Cover. The Steel Bollard comes in the following sizes: bollard diameters: 6", 8", 10, and 12"; corresponding bollard heights: 36", 42", 48" and 54".

You are encouraged to review and update your security needs to see how bollards can increase your protection against any suspected threat. Keep in mind that a minimum of two bollards are needed for protection; not considering this fact could be disastrous.

Photo A The simple addition of a Concrete Bollard Cover turns an ordinary sidewalk into an imposing obstacle. Please note only one barricade was used for this demonstration. For minimum security measures use at least two bollards.

Photo B: The placement of the Bollard in front of the door protects employees and visitors from possible vehicular threats as they enter and exit the building.

Photo C: The Bollard also serves as a visual parking guide.

Photo D: The Bollard not only protects the door from a head on vehicular attack; it also protects the vulnerable windows from a side angle attack. Remember, for minimum security standards at least two bollards must be in place.

Photo E: A close-up view of the CBP Decorative Concrete Bollard Cover. This product is highly customizable; simply supply us with the required dimensions.

DECORATIVE CONCRETE BOLLARD COVER

DECORATIVE PLASTIC BOLLARD COVER

See how the 347th Security Forces at Moody AFB are utilizing our products.

After removing the steel bollards, the openings are typically covered over with some form of unattractive "cap".

Simply place the CBP Plastic Bollard Cover over the openings and once again you will have an aesthetically pleasing landscape.

***It is important to never use just one bollard. Two are required for minimum proper protection.**

Creative Building Products would like to call your attention to the Decorative Plastic Bollard Cover. Since September 11th, crash barriers have become more and more prevalent in both civilian and military applications; however, simply using a plain steel crash bollard isn't always the best or the most attractive solution. With that in mind, CBP has designed a pleasing alternative that will not only give the highest level of security demanded by our customers but also offer an architectural ornament that will complement any landscape.

Public safety and the security of government buildings have taken on a new sense of urgency. The Decorative Plastic Bollard Cover can provide a simple, secure and cost effective method of protecting the public from accidents and acts of terrorism by providing strong, cost-effective safeguards. When strategically located, the Bollard will give 24-hour protection and there's no need to worry about appearance. Its look of quiet elegance will make an aesthetically pleasing addition to your security. Sand, water or concrete ballast can be added for extra protection if needed. For a quick solution, simply place the empty Bollard Cover in front of a Gate or over a removable steel bollard. The quality construction and heavy-duty appearance will work as a quick deterrent.

Capable of being customized for any situation the CBP Bollard Cover is manufactured with the following outside diameters: 18", 20", 24", and 28"; corresponding Cover heights: 42", 48", 54" and 60". These precision controlled sizes ensure that the Cover will fit over any steel bollards up to 54" in height. The Bollard Cover can also be customized to fit any size, shape or situation by simply measuring your existing steel bollard and calling us with your specific needs.

If requested, CBP will also supply the steel bollard to fit inside the Bollard Cover. The Steel Bollard comes in the following sizes: bollard diameters: 6", 8", 10, and 12"; corresponding bollard heights: 36", 42", 48" and 54". All colors can be ordered although Gray Granite and Tan Granite are the most popular.

You are encouraged to review and update your security needs to see how bollards can increase your protection against any suspected threat. Keep in mind that a minimum of two bollards are needed for protection; not considering this fact could be disastrous. Simply measure your Bollard for the height diameter and we will match it.

B.

Photo A: If you require the protection of a bollard but don't want to look at an ugly, peeling, rusting metal tube every day; simply put the high-density Plastic Cover over the bollard and immediately improve the appearance of the landscape.

Photo B: Installing the Plastic Cover could not be easier. All that is needed is to lift the Cover over the top of the bollard and then drop it into place.

C.

D.

Photo C: In a matter of seconds the unattractive bollard is hidden by the aesthetically pleasing Plastic Cover. You still have the same level of security but now it looks good too!

Photo D: Close-up view of the CBP Decorative Plastic Bollard Cover. The Cover is customizable to fit any size steel bollard.

E.

F.

Photo E: Even compared with a vehicle like the Ford Excursion the Plastic Cover is an imposing obstacle.

Photo F: All you need to decide is which look you prefer!
