Emergency Response Unit

The ERU is a "must have" for all the folks that need to act in emergency situations and don't want to waste time looking all over the base for the required equipment. This unit is complete, compact, and ready to roll at a moments notice. Possible uses:

Elevated Threat Levels . Gate Closures
Random Checkpoints . Random Sobriety Tests . Security Operations . Personnel Denial & Channel Restriction

CREATIVE BUILDING PRODUCTS

Providing security solutions for a changing world since 1977.

Photo A is of the rear view. This Emergency Response Unit gives the user the ability to easily store Barricades and other necessary equipment when not needed. However, when an emergency situation arises, all equipment can be visually accounted for and ready to go in minutes.

Included with this Kit are twelve heavy-duty Barricades. Each Barricade is 6ft in length which equals an impressive 72 feet of protection.

By using heavy duty welded construction, CBP has manufactured a highly durable Emergency Preparedness Kit that will stand up to almost anything you can put it through.

In an emergency, time is of the essence. Note the box on the front of the Kit. This box will hold all those small, yet vital parts you'll need to do your job effectively. A pintel hookup, yellow tape, stake driver, and the like are just a small example of what the Box can hold.

The Emergency Kit can be hooked up to any vehicle by using either a Ball or a Pintel Hitch. Note the Heavy Duty Safety Chain.

This highly useful Kit has plenty of room for those items you can't be without. Note the extra space available to transport Concertina Wire, stakes, or anything else you might need.

A Stacking Pole has been added that will easily hold the twelve (12") included plastic orange traffic cones.

The Pipe on each side is designed to be removed and serve as a ramp for the Barricades. The Kit can be loaded and unloaded with a minimum of 2 people.

There is a mounting plate for easy identification.
