Photo A: Shows the Floating Boom unassembled. The Floating Portable Boom is manufactured from Polyethylene plastic and is color treated with UV stabilizers. Designed using the suggestions of experienced security personnel in the U.S. military, the Floating Boom is produced in precise 8 foot sections and can be spaced according to your security needs.

Photo B: The Portable Floating Boom can be assembled either in the water or on deck and then placed into position.

Photo C: The Portable Floating Boom uses rust resistant stainless steel hardware. The signage board is capable of having printing on both sides and in any language. The careful design of the Boom makes it self-rightable and practically unsinkable as all the plastic parts are filled with closed cell foam.

Photo D: The optional flashing safety light can be seen for 2 nautical miles. Is available in all basic light colors and is solar powered.

Photo E: CBP's Floating Portable Boom is a high quality, excellent edition to your security needs. Assembly can be completed by one person in approximately 5 minutes; it is recyclable, recoverable, repairable, and there are no loose tools required for assembly.

Photo F: The Floating Portable Boom is currently being used by:

Norfolk Naval Shipyard (NNSY)
Naval Aviation Maintenance Program (NAMP)
SUPSHIP
San Diego Naval Station (NAVSTA)
Portsmouth- Kittery Naval Shipyard
Travis AFB
Bangor Naval Submarine Station
