MOBILITY & STORAGE BOXES with CUSTOMIZED FOAM INSERTS

These boxes were developed & designed by Air Force mobility personnel.

This innovative solution will **eliminate common problems** associated with wooden and metal boxes such as: splinters, weight, rust, sharp edges, and paint problems.

Expensive, essential, and life-saving equipment often arrives at its destination unserviceable because it was thrown carelessly into hard, unyielding, wooden or metal boxes. Creative Building Products has found a way to make all the Security Forces jobs quicker, easier, and safer.

By using CBP's lightweight, plastic mobility boxes with customized die-cut foam inserts you can ensure that delicate equipment will arrive undamaged and ready to use. These inserts have cutouts that are specifically designed to handle your equipment. The density of the foam easily protects equipment that could be damaged by rough handling.

CBP has drop tested these Mobility Boxes from a height of 20ft and there was no damage to the box or to the contents. If a similar test had been performed on a metal box it would have broken, warped, bent and possibly become unusable. Creative Building Products warranties these Mobility Boxes for 10 years. If, under normal usage, they would become unusable, CBP will replace them at no cost.

These mobility boxes are currently in use by the Security Forces. What items can we protect for you?

SPECIFICATIONS:

- No static discharge
- No tools or hardware needed for assembly
- Designated Place for a Packing List
- Waterproof, Rustproof and Rotproof
- Vermin Proof
- Color is Olive Drab or Desert Tan
- High Quality Plastic Construction
- No Wasp or Rat Surprises
- Lockable if Desired
- Can be repaired
- No paint to flake off or scratch
