PLASTIC
NEST BOX UTILITY SET

Replacement for the old, heavy,
wooden box set

Creative Building Products, with the assistance of experienced military personnel, has designed a Nest Box Utility Set that is manufactured of high quality plastic. The nested set includes three boxes in three different sizes. Weighing only 67 lbs when empty it is half the weight of the old, wooden nest boxes which are a heavy 113 lbs when empty!

Our product is versatile, useful, and durable. When not in use the Nest Box Set is designed to stack inside, or on top of, one another thus eliminating storage problems and saving on limited space. Manufactured from Polyethylene plastic, it is lightweight, rust, water, and rot proof and eliminates the need to use heavy wood and metal boxes.

Each box will be secured with two heavy duty Velcro straps allowing easy retrieval when nested and the strap keepers will keep each strap in place to prevent loss. This product can be opened within seconds by simply lifting out each box using the convenient Velcro straps, undoing the strap by pulling it through the buckle, and removing the top lid. The top of each lid is designed with a special smooth area upon which a packing slip can be attached in order to identify the contents. Utilizing the set requires no tools or loose hardware and eliminates time consuming, awkward assembly for deployment.

The versatility of these boxes are endless due to the three different sizes. Possible uses may include storage of food (our plastic is food grade material), loose tools, oil, gas, computer equipment, electrical equipment and much more... Just use your imagination.

Large, Medium, and Small Nest Boxes. The boxes can be ordered as a set or ordered individually. The spring loaded handles on each box will not snag as the old, wooden units do.

The Nest Box, open, showing all three sizes neatly stacked inside. The wheels on the large box make moving a breeze for just one person.

The Nest Box Set is secured using velcro instead of screws that will rust and become lost. Note the indentations specifically designed to keep the straps in place. The strap keeps located on both sides secure the straps to the box and prevent loss.

Manufactured of Polyethylene Plastic, the CBP Nest box is rust, water, and rot proof. Note that the Nest Box is designed to be opened without any hardware or tools; simply undo the velcro straps and take off the lid!

No more pinched fingers or splinters to worry about! Our velcro straps make it easy and simple to remove the boxes from their nested positions.

The versatility of these boxes are endless due to the three different sizes. Possible uses may include storage of food (our plastic is food grade material), loose tools, oil, gas, computer equipment, electrical equipment and much more... Just use your imagination.

When not in use the Nest Box Set is designed to stack inside, or on top of, one another thus eliminating storage problems and saving on limited space. Note the wheels on the bottom of the large Nest Box. These wheels will help personnel to transport the boxes from place to place without any strenuous lifting.

The Nest Box is easily moved from place to place by using the convenient **carrying handle and wheels**. With an empty weight of only 67 lbs anyone can move it!

The Nest Box Set is so light that it can be moved simply by picking it up by the straps! The wheels on the bottom of the large box are an invaluable commodity if extra support is needed for a heavy load.

The Nest Box Set is versatile, useful, and **durable**. The old Sarge weighs around 250 and his weight is easily being supported by the high grade plastic.
