

HUMMER FLOORBOARD BLAST ATTENUATORS

The protection of military personnel from terrorist bomb attacks has become vitally important in military operations and security throughout the world. The numerous attacks from terrorists who are using explosive weapons account for a high number of injuries and death. One way to ensure the safety of our soldiers is to utilize new technology. CBP is the leading manufacturer of blast attenuators in the United States and has thoroughly examined the effectiveness of their products with both blast and ballistic testing.

The CBP Humvee Blast Attenuator Set has been molded to fit the shape of the floorboards. This not only allows the vehicle's occupants a comfortable place to rest their feet but also gives them the security of knowing that the CBP Hummer Attenuators are providing significantly more protection than sandbags.
