

ONE MAN JAILCELL

The one person jailcell is a portable module designed to securely restrain, isolate, and control an individual under legal apprehension. This is an ideal product for law enforcement personnel who may need to detain people without being able to leave the premises. For example, the Jailcell could be setup beforehand at Fairs, Concerts, Shows, or any public event, in order to detain rowdier elements or even as a deterrent to potential troublemakers.

This Jailcell is easily erected with 2 - 4 men and can be accomplished in approximately one hour. All the panels are interchangeable allowing you to position the door, the optional 1-way mirror, and the optional sound deadening panels in the most convenient position.
