

K12 RATED REVETMENT WALL

CBP has been hard at work engineering a new product specifically designed to protect critical infrastructures, military personnel, and innocent civilians from terrorist attacks involving explosive weapons. While a form of this Wall has been in use by the U.S. military for some time, CBP has uniquely modified the design in order to offer a higher degree of protection. The Revetment Wall's protective properties can also be used to safeguard the civilian sector in areas such as: industrial, commercial, and government buildings of all types.

The CBP Revetment Wall is customizable to your security needs. The prefabricated standard height is up to 16 feet tall by 8 feet wide. The length is determined solely by your security requirements and threat levels. There are no loose parts to lose and it has a snap together frame for easy setup and takedown.
