## SEA BOX

The Sea/Cruise Box is 16.5" x 31" x 16" and is manufactured from high-density polyethylene. It is rot proof, rust proof, and water resistant. Because of the high quality material, it is also resistant to dents, dings and general damage. It is extremely sturdy and durable as it was designed to withstand rough transportation and long-term storage. Even when empty it is strong enough to support the direct weight of 250 lbs.

Using the input of experienced military personnel this product has been created to make the transporting of personal belongings more efficient. Instead of wasting time trying to maneuver awkward, heavy, wooden or metal boxes with their sharp corners, it is simpler to use the CBP Sea/Cruise Box. Weighing only 28 lbs when empty, with smooth, rounded corners, a retractable carrying handle, recessed wheels, side handles, and adjustable Velcro straps, the troops can finish packing and moving their belongings in record time.

Instead of struggling to lift an over-packed box simply pull out the customized, aluminum, retractable handle and maneuver it using the recessed wheels on the bottom. The combination of the wheels with the handle will allow the user to easily pull the Box behind them instead of struggling to lift it and possibly injuring themselves. The handle should be retracted when the Sea/Cruise Box is not in use. Once retracted it can be indefinitely stored in tight spaces with no deterioration from the elements.

There will be times when lifting the Box will become unavoidable. When this happens simply retract the handle and lift it using the conveniently placed side handles. These handles will snap down and out of the way when not in use. The included Velcro straps allow the lid to be held firmly in place during storage or transportation. If a more secure option is desired, the Velcro straps can be ordered with lockable inserts and aircraft anti-cut cable installed.

#### **SPECIFICATIONS:**

- 16.5" x 31" x 16"
- 28lb empty weight
- Can hold up to 600 lbs
- Recessed Wheels
- Retractable Handle
- Extra Side Handles
- Highest Quality Construction
- Vermin Proof, Rotproof, Rustproof, Water Resistant
- Color is Olive Drab or Desert Tan with UV inhibitors
- Color is all the way through product
- Integrated Handle

The Sea/Cruise Box is manufactured from high-density polyethylene. It is rot proof, rust proof, and water resistant. Because of the high quality material, it also resists dents, dings, and general damage.

Note the wheels on the bottom and the retractable handle. This design feature will eliminate having to manually lift an awkward, heavy, or unmanageable wooden or aluminum box.

The CBP Sea/Cruise Box is 16.5" x 31" x 16" and weighs 28 lbs when empty. This product is extremely durable as it was designed to withstand rough transportation and long-term storage.

The included velcro straps allow the lid to be held firmly in place during storage or transportation. If a more secure option is desired the velcro straps can be ordered with a locking feature and anti-cut aircraft cable installed.

To open the box, simply undo the velcro straps, remove the lid and pack your personal belongs inside. Note that the retractable handle lies flush against the Box when not needed. This feature makes it easy to store in tight, or limited spaces.

The Sea/Cruise Box is lightweight and can easily be picked up by using the convenient handles on the side. Note that the side handles will snap down when not in use.

The Sea/Cruise Box is extremely sturdy and durable. Weighing only 28 lbs when empty it is easily strong enough to hold, unsupported, 250 lbs.
